CEP

# BRAND MISSION STATEMENT

## WHO WE ARE

At CEP we believe that life is better when you run.

Better means faster times. Better means fewer injuries.  
Better means quicker recoveries.

We take runners to new heights with medically backed technology and finely engineered equipment. Creating elite products that activate the body and improve performance is what we do. No gimmicks, no false promises. We use medical-grade technologies, production facilities and testing to find innovative solutions through ingenuity and passion.

CEP is for athletes looking to level up their run with high-quality equipment. Our carefully engineered gear is with you every step of the way, giving both support and a cutting edge where it counts.

RUN BETTER.

## THE SCIENCE

We specialise in transforming medical technologies into best-in-class sports gear.

All our products are developed by our team of scientific researchers, biomedical engineers, champion athletes and sportswear designers at our facilities in Bayreuth, Germany. At the core of everything we do is a passion for innovating, improving performance and making runners feel their best. CEP is made in the lab, and brought to life by athletes.

Since 2007 we've been perfecting the translation of medical-grade compression into performance-enhancing equipment for athletes that benefits oxygen supply, muscle performance and recovery.

In 2024 we brought our innovation to footwear, launching the Omnispeed. Our game-changing running shoe uses BowTech™, a patented kinetic technology that enhances the natural mechanics of the foot, measurably boosting energy return while providing a healthier run.

And when we're done, we keep going. We continuously challenge ourselves to ask what's next and to go beyond the expected as we test and invent new tools for running.

## OUR HERITAGE

CEP is a young brand, but our roots run deep. We were founded in 2007 by the minds behind medi, a family-owned specialist in medical compression technology, that has been at the forefront of its industry for over 70 years.

When we first started out, compression in running was a niche topic. The idea of wearing long socks, let alone compression socks for races, seemed strange and had never been tested.

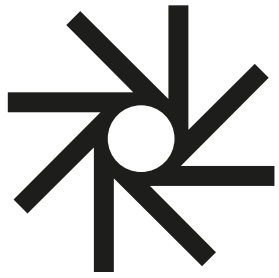

Our founder, Dr Michael Weihermüller, had a hunch that athletes could benefit from compression just as much as patients. On 1 July 2007, after nine months of testing, German triathlete Timo Bracht set a new course record at the IRONMAN European Championship in a pair of bright white CEP knee-highs. The next day they were sold out, and before long there wasn't a serious runner out there who hadn't heard of compression.

The same unstoppable mindset and pursuit of excellence is in everything we create. Our medical expertise and quality of scientific engineering allows us to push the boundaries of what's possible, while our passion and drive bring our ideas to life. We are grounded in a commitment to challenging the status quo, a love for creative thinking and a belief that innovation never stops.

---

## CEP TECHNOLOGIES

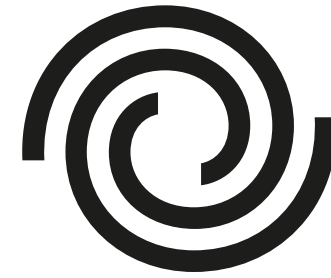

---

---

### TAILORED COMPRESSION

Lightweight compression panels made from engineered fabrics allow for a linear compression profile designed for a carefully defined anatomic fit throughout the garment. Multi-dimensional movement within the fabric supports joints and muscles.

---

### 3D COMPRESSION

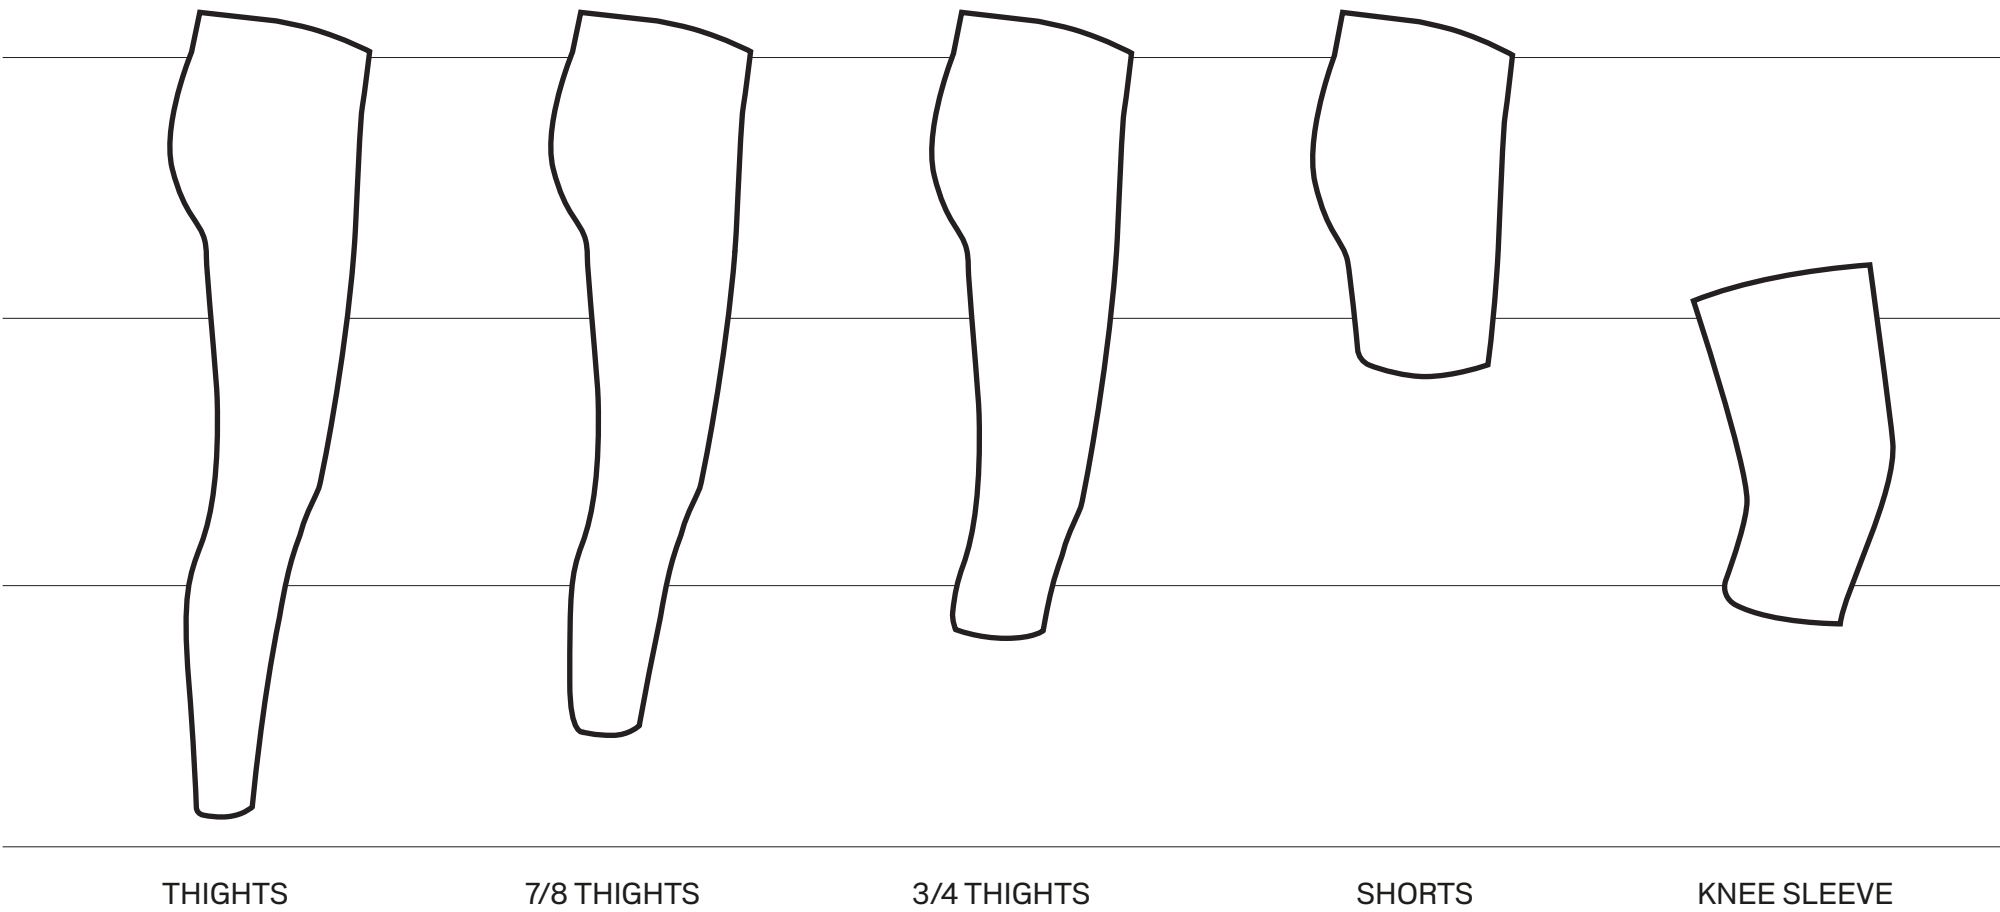

Our signature compression technology. Engineered on site in Germany. Circular knitting techniques allow for 360° compression with precisely controlled zones of support and activation dispersed throughout the garment.

COMPRESSION ZONES

**THIGH ZONE**  
REDUCED MUSCLE VIBRATIONS

**KNEE ZONE**  
KNEE JOINT STABILIZATION

**CALF ZONE**  
LIGHT LEGS

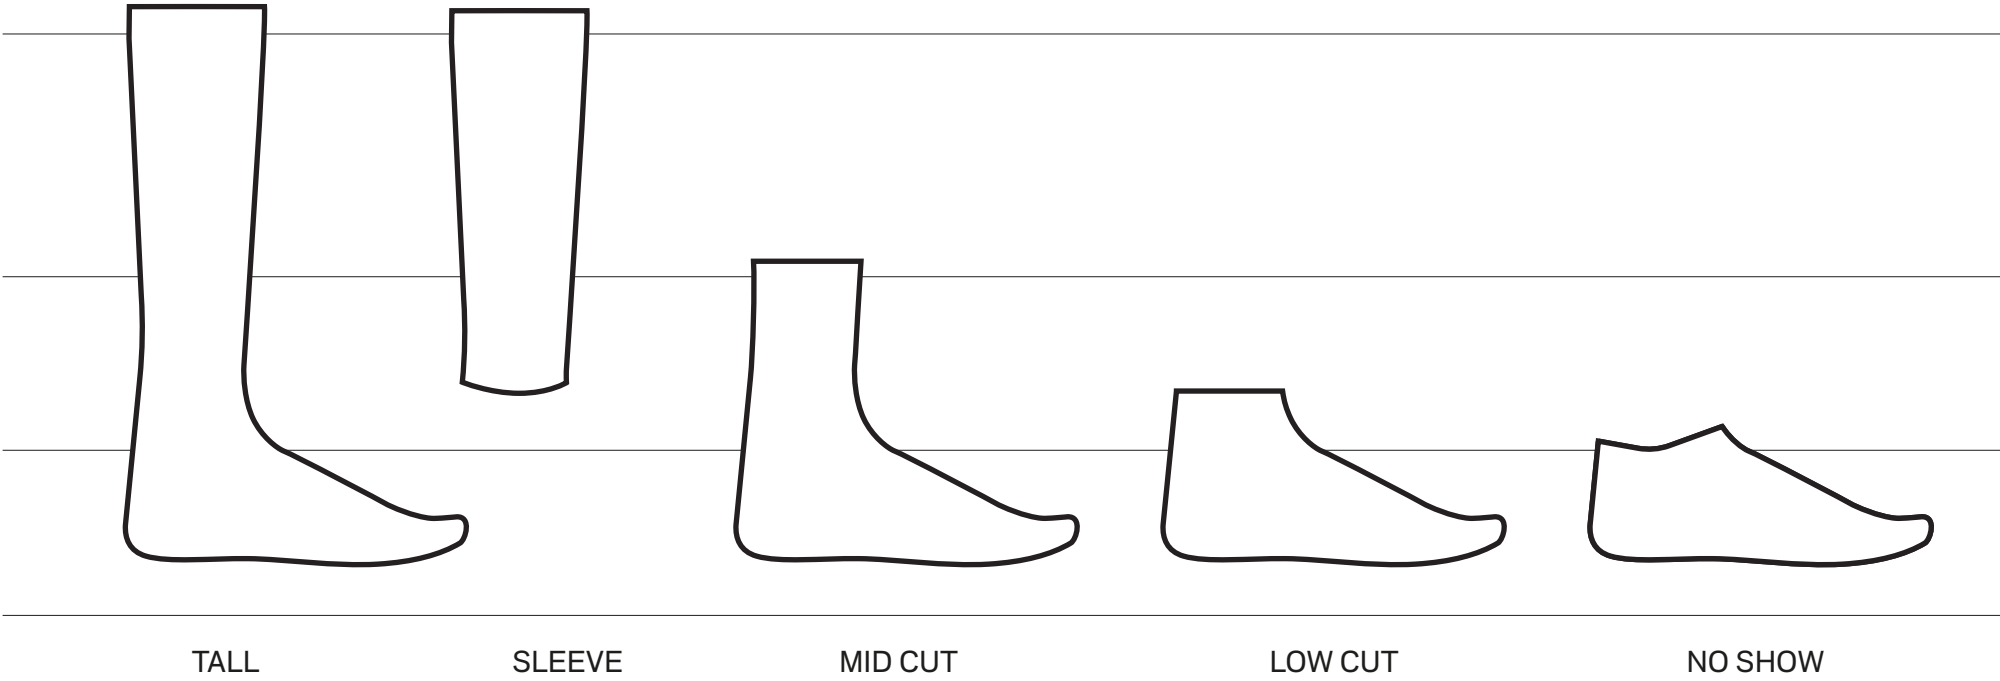

SOCKS & SLEEVES

**CALF ZONE**  
FASTER RECOVERY

**ANKLE**  
ANKLE STABILIZATION

**FOOT ZONE**  
BLISTER PREVENTION

# NEW FIT & EXPLANATION

## TIGHT FIT

Body-hugging design with gentle compression for a secure and comfortable stay-put fit.

## SLIM FIT

Form-fitting, snug design for a close fit.

## REGULAR FIT

Regular, straight design for a relaxed fit.

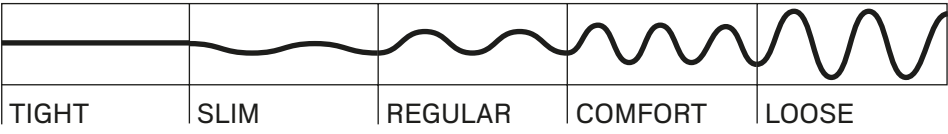

## COMFORT FIT

Slightly wider cut for a loose fit.

## LOOSE FIT

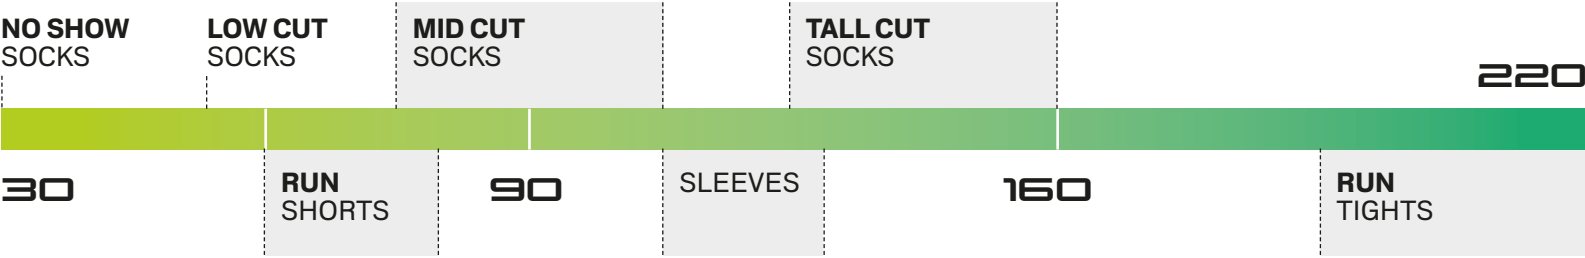

Loose design for maximum freedom of movement.

What are the differences in the various fits?

# COMPRESSION SCORE

The higher the compression score, the greater the compression effect on the body. The score is based on the area covered and the pressure of the compression at several measuring points.

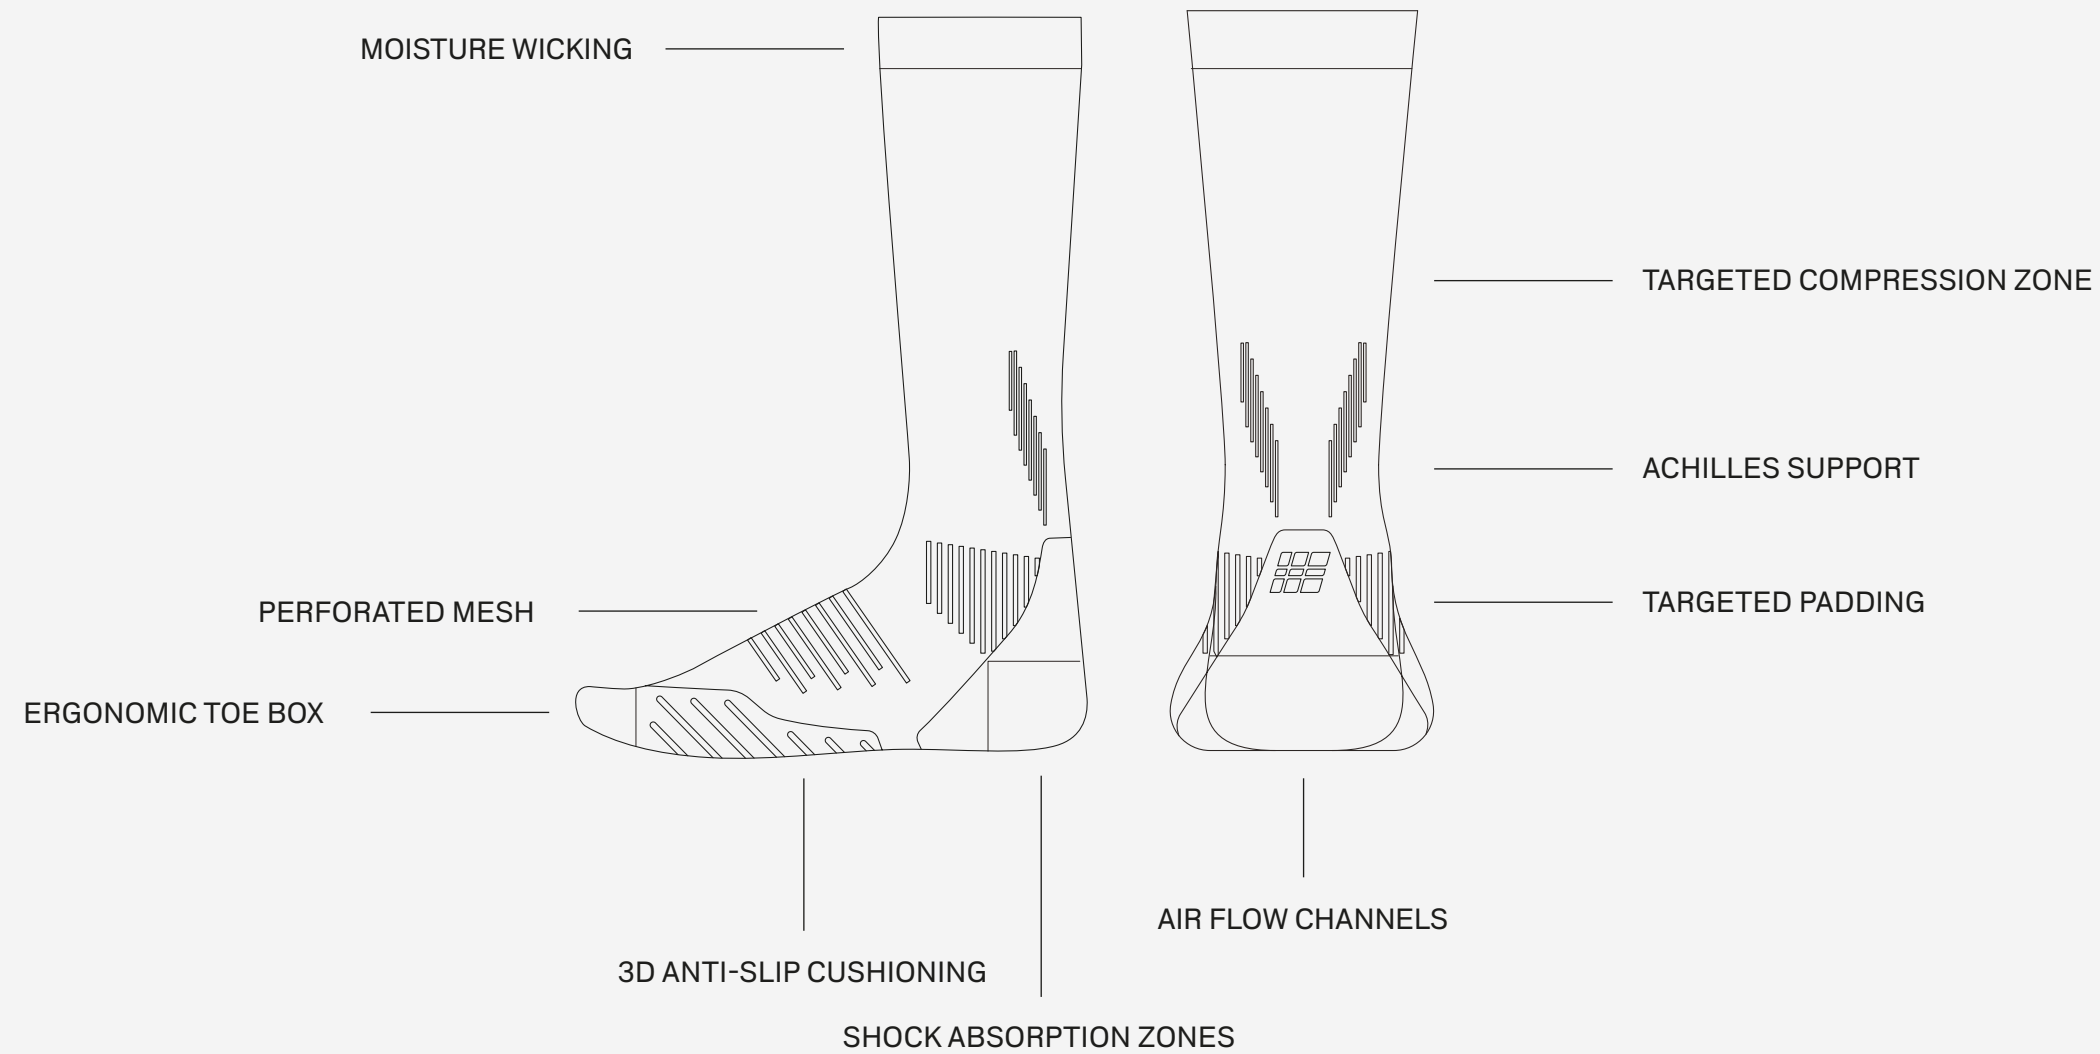

A low-angle, close-up shot of two runners on a sandy dune. The runner in the foreground is wearing bright orange socks with the 'CEP' logo and black running shoes. The runner in the background is wearing a yellow shirt, grey shorts, and white socks. The scene is set against a clear blue sky and the rugged, sandy terrain of a dune. The word 'socks' is overlaid in white text in the center of the image.

socks

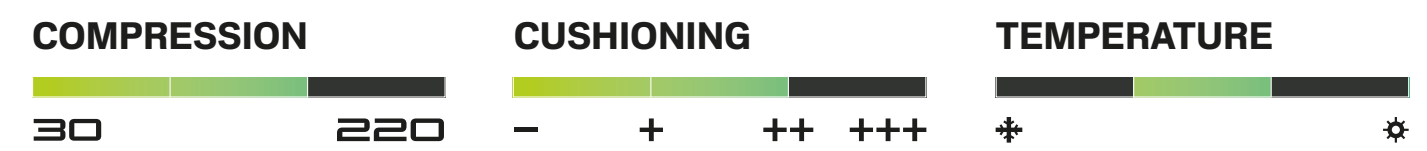

# CORE RUN COMPRESSION SOCKS

“Made for every runner and every run. **CORE** is for high-quality essentials designed to meet all conditions from daily training to long-distance challenges. These are the building blocks from which great runs are made.”

CORE RUN  
COMPRESSION SOCKS – TALL, 5.0 – MEN

**CORE RUN**  
SOCKS – TALL, 5.0 – MEN

**Article No.:** WP805R  
**Model No.:** WP80R  
**Color & Code:** BLACK 301

# CORE RUN ULTRALIGHT COMPRESSION SOCKS

“Made for every runner and every run, **CORE** is for high-quality essentials designed to meet all conditions, from daily training to long-distance challenges. Our thinner option, ideal for higher temperatures, features high-quality lightweight fabric with reduced, but anti-slip cushioning. Perfect when conditions get more challenging.”

A person is sitting on a wooden bench, wearing dark red CEP recovery socks with black heels and toes. The person's hands are resting on their knees. The background shows a kitchen with white cabinets and a wooden floor.

**RECOVERY**

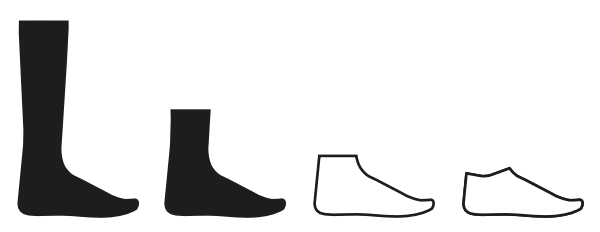

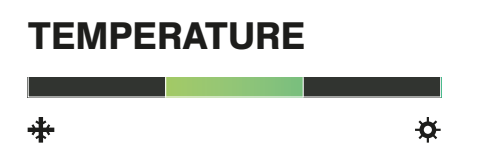

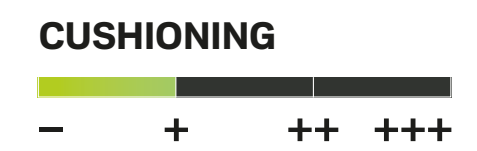

## HEALTH RECOVERY COMPRESSION SOCKS

“Compression alleviates muscle soreness and promotes blood flow and removal of metabolic waste. This results in faster recovery times between runs, allowing you to bounce back stronger and ready to tackle your next challenge.”

A male runner is captured in mid-stride, running up a sandy dune. He is wearing a bright yellow short-sleeved shirt, dark shorts, a yellow cap, and white socks with black shoes. The background features a clear blue sky and a rugged, eroded sand dune. The word "APPAREL" is overlaid in large, white, bold capital letters, centered horizontally and partially obscured by the runner's legs. The text is flanked by two thin white horizontal lines.

**APPAREL**

A female triathlete with curly hair is shown in a desert landscape under a clear blue sky. She is wearing a white visor, a bright orange cycling jersey, and white arm warmers with the 'CEP' logo. She is sitting on a rocky outcrop, looking off to the side with a focused expression. The word 'ACCESSORIES' is overlaid in large white capital letters across the center of the image.

A man and a woman are running on a paved path on a bridge. The man is in the foreground, wearing a green athletic shirt, black shorts, and a knee brace on his left knee. The woman is running slightly behind him, wearing a black athletic top and black shorts. The bridge has a green metal truss structure. In the background, there are hills under a clear sky. The word "ORTHO" is overlaid in large white letters across the middle of the image.

MAX SUPPORT  
ACHILLES SLEEVE – UNISEX

**Article No.:** WO66BG  
**Model No.:** WO66G  
**Color & Code:** BLACK / WHITE 313  
**Gender & Sizes:** UNISEX XS – XL  
**Material:** 58% Polyamide,  
21% Spandex,  
21% Polyester  
  
**MSRP:** €60.00

- Description:**
- Protection and relief of the Achilles tendon thanks to perfectly positioned, highly adaptive silicone pads with an anatomical design
  - Fewer injuries thanks to deep sensory stimulation of joints
  - Wrinkle-free compression for greater sensibility and control in shoes

MAX SUPPORT  
ACHILLES SLEEVE – UNISEX

**Article No.:** WO665G  
**Model No.:** WO66G
